MANSI BOGHRA

Sr.Python Developer +91 9016197130 mansiboghra11@gmail.com

SUMMARY

Experienced Python Developer with 4 years of hands-on experience in building scalable backend systems, RESTful APIs, and database-driven applications. Strong expertise in Python-based frameworks and backend architecture, along with practical experience in developing and integrating AI-driven solutions. Proven track record of collaborating with cross-functional teams, delivering high-quality solutions within deadlines, and consistently meeting business requirements.

SKILLS

- **Frameworks:** Django, Django REST Framework (DRF), FastAPI
- **Databases:** PostgreSQL, SQLite, MongoDB, Supabase
- **Web & Application Servers:** Nginx, Apache, Gunicorn
- **Cloud & Hosting:** DigitalOcean, AWS (EC2, S3), Linode, PM2
- **Others:** REST APIs, Authentication & Authorization, OAuth, WebSockets, Celery, Push Notifications (FCM, OneSignal), Elasticsearch, Database Triggers, Django Signals
- **Generative AI & LLMs:** OpenAI API, Google Gemini, Vertex AI, Replicate, LangChain, CrewAI, Retrieval-Augmented Generation (RAG) Pipelines, Google Document AI

WORK EXPERIENCE

ITCode Infotech **June 2026 - Present**

- Building scalable backend systems and AI-driven applications using Python, FastAPI, Django, and Generative AI.
- Developing production-ready AI solutions including RAG pipelines, agents, and chatbots.

Kmphitech LLP **July 2025 - May 2026**

- Built backend systems and APIs using FastAPI and Django for AI-driven applications.
- Developed Generative AI solutions including RAG pipelines, chatbots, legal research, meal, and workout planners.
- Worked with modern AI frameworks and LLM platforms to build scalable, production-ready features.
- Collaborated with cross-functional teams to deliver solutions aligned with business and client needs.
- Delivered projects including Runsheet.AI, OMGLOL, Healthy-Hustle, Imposter, Pocket-Handyman, PremiumCrap, HandyMatch, Batchly, and Nomly.

Grewon Technologies Pvt. Ltd **Sep 2022 - May 2025**

- Worked as a Senior Developer, designing and developing scalable Django web and mobile applications with RESTful APIs. Optimized database queries and application performance using Django ORM.
- Built solutions across e-commerce, dating, gaming, HRMS, and real-time stock management domains.
- Integrated payment gateways, Celery with Redis for background tasks, and WebSockets for real-time chat and notifications.
- Delivered production projects including HRMS, Cicero, Dottore, PBSM, Stockel, Sumoti, Gex Chart, CallerID, LovigNite, and YollaDating.

EDUCATION

Master of Computer Applications **2022-2024**
Jain University

Bachelor of Computer Applications **2019-2022**
Shree Uttar Gujarat B.B.A & B.C.A College

PROJECTS

Cicero Applications:

- Developed a multi-role **e-commerce** platform connecting suppliers and clinics, with dedicated workflows for clinics, suppliers, and admins. Enabled suppliers to bulk upload products via Excel and XML, allowing clinics to place orders seamlessly. Implemented real-time notifications for order updates, receipts, and status changes. Integrated **Elasticsearch** to support fast and accurate product search across large inventories. Improved product management, stock control, and overall user experience for both suppliers and clinics.

Stock Market Tracking and Notification System:

- Built a backend for a web and mobile app to fetch real **stock market data** via external APIs, calculate profits, losses (including options: Open, Call, Put), and deliver flexible notifications using Signal and Firebase Cloud Messaging (**FCM**) based on market movements.

Yolla Dating :

- Developed the backend for **Dating Application** with phone-based authentication, profile management, and a custom compatibility matching algorithm for instant matches. Built real-time notifications for matches, date requests, and availability, and integrated secure **payments**, wallets, and refunds. Optimized APIs for scalability and performance.

Runsheet.AI:

- Developed an AI-powered document management platform using FastAPI, enabling users to create projects, upload documents, and interact through an **agentic RAG**-based chatbot that retrieves answers from uploaded files. Built as a GenAI web application with chart visualizations to summarize documents and present key insights for easy analysis.

OMGLOL (Dog Coloring Book):

- Developed scalable Django backend with an AI-powered platform that allows users to upload dog details and generate 100 unique AI-created outline art images using **Google Gemini AI** after payment.
- Enabled users to create personalized digital books, purchase additional image generations via Stripe, and order printed copies through **Lulu print-on-demand**.

Healthy-Hustle:

- Developed the AI layer for Healthy-Hustle using FastAPI, building a GenAI solution for personalized meal and workout plans. Applied **few-shot prompting** and fine-tuned LLM responses to improve recommendation accuracy.
- Built a conversational chatbot for health and fitness guidance and user queries.

Handy-Match

- Developed a **role-based** task management system with an admin panel for property assignment, user management, and analytics. Implemented three roles like a Tenant, Manager, and Handyman with role-based authentication.
- Tenants can create maintenance jobs with media (image/video) uploads, integrated with **Google Gemini AI** for **issue detection**. Managers can organize jobs into packages and manage work requests. Handymen can view assigned packages, request tasks, and execute work upon approval.
